Office Action Summary

Application No.

10/630,589

Applicant(s)

STICKLER ET AL.

Examiner

Igor N. Borissov

Art Unit

3628

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 July 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-96 is/are pending in the application.
- 4a) Of the above claim(s) 1-32, 48, 64, 80, 95 and 96 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 33-47, 49-63, 65-79, 81-94 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/808)
- Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
- Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Response to Amendment

Amendment received on 07/02/2008 is acknowledged and entered. Claims 1-32, 48, 64, 80, 95 and 96 have been previously withdrawn from consideration. Claims 33, 36, 42, 43, 49, 50-52, 55, 58-60, 63, 65, 75-76, 81, 84, 89-91 have been amended. Currently, claims 1-96 are pending in the application.

Claim Rejections under 35 USC § 101 and 112 have been withdrawn due to the applicant's amendment.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1.

Claims 33-47, 49-63, 65-79 and 81-94 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kara (US 6,233,568 B1) in view of Manduley et al. (US 5,324,893).

Kara teaches a method, system and computer-readable medium having computer-readable instructions embedded therein for causing a computer to implement said method for receiving payment for postage for a parcel, comprising:

Claims 33, 49, 65, and 81,

receiving from the customer mailing information for a parcel, the mailing information comprising customer-determined attributes of the parcel (Figs. 7-8A; C. 5, L. 60-67; C. 19, L. 55-65; C. 20, L. 62-67);

calculating a first postage value based on the customer-determined attributes (C. 5, L. 43-52; C. 9, L. 36-42);

transmitting data to the customer to permit printing by the customer of a mailing label for the parcel, the mailing label including an indication of the first postage value (P. 6, L. 1-2; C. 20, L. 1-3);

charging a customer account for the first postage value (C. 6, L. 12-21; C. 22, L. 13-19).

Kara does not specifically teach:

that said attributes comprising at least one of height, length, and thickness of the parcel;

determining attributes of the parcel by the delivery system operator;

calculating a second postage value for the parcel based on the operator-determined attributes; and

transmitting a postage payment adjustment amount to the customer account based on a comparison between the first and second postage values.

Manduley et al. teaches a method and system for verifying postage amount, wherein the actual/proper postage due is compared with the amount submitted by a sender (C. 4, L. 58-60). In operation, the geometrical dimensions of the individual mailpieces are obtained and compared with operator inputted dimensions of a sample of the mailpieces batch, the proper postage rate is computed and compared to the amount submitted by a sender, and a postage payment adjustment amount is transmitted to the customer account based on a comparison between the first and second postage values (C. 5, L. 53 - C. 6, L. 8; C. 6, L. 23-35).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Ramsden to include transmitting a postage payment adjustment amount to the customer account based on a comparison between the first and second postage values, as disclosed in Manduley et al., because it would

advantageously allow to avoid returning short paid mail to the sender where more postage is required.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Kara to include that said attributes comprising at least one of height, length, and thickness of the parcel, because it would advantageously allow to facilitate processing batches of mailpieces with enhanced accuracy by relying on important attribute of the sample taken (Manduley et al., C. 5, L. 34-52). And it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Kara to include determining attributes of the parcel by the delivery system operator; calculating a second postage value for the parcel based on the operator-determined attributes; and transmitting a postage payment adjustment amount to the customer account based on a comparison between the first and second postage values, as disclosed in Manduley et al., because it would advantageously allow to avoid returning short paid mail to the sender where more postage is required.

Claims 34, 35, 50, 51, 66, 67, 82 and 83. Kara discloses that the mailing information is received from the customer over a network (Fig. 1A).

Claims 34, 35, 50, 51, 66, 67, 82 and 83. Ramsden discloses that the mailing information is received from the customer over a network (the Internet) (Fig. 1A).

Claims 36, 52, 68, 84. Kara discloses that the customer-determined attributes include at least one of height, length, weight, thickness, and weight of the parcel (Fig. 8).

Claims 37, 53, 69, and 85. Kara discloses that the mailing information comprises at least one of return address information, destination address information, and payment information (Fig. 8).

Claims 38, 39, 54, 70, 71 and 86. Kara discloses that the mailing information comprises at least one of return address information, destination address information, and payment information (Fig. 8).

Claim 40, 56, 72, 87. Kara discloses that the customer account is a credit card account (C. 31, L. 44).

Claims 41, 57, 73, and 88. Kara discloses that the mailing label further comprises a unique identification code for the parcel (Fig. 3B; C. 9, L. 40-43).

Claims 42-47, 55, 58-63, 74-79 and 89-94, see reasoning applied to independent claims.

2.

Claims 33-47, 49-63, 65-79 and 81-94 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ramsden et al. (US 6,105,014) in view of Manduley et al. (US 5,324,893).

Ramsden et al. (Ramsden) teaches a method, system and computer-readable medium having computer-readable instructions embedded therein for causing a computer to implement said method for receiving payment for postage for a parcel, comprising:

Claims 33, 49, 65, and 81,
receiving from the customer mailing information for a parcel, the mailing information comprising customer-determined attributes of the parcel, said attributes comprising at least one of height, length, and thickness of the parcel (manual input by the customer including the dimensions of the parcel) (C. 20, L. 18-19);

calculating a first postage value based on the customer-determined attributes (C. 20, L. 65-67);

transmitting data to the customer to permit printing by the customer of a mailing label for the parcel, the mailing label including an indication of the first postage value (C. 21, L. 15-35);

charging a customer account for the first postage value (C. 19, L. 17-38; C. 22, L. 43-62);

determining attributes of the parcel comprising at least one of height, length, and thickness of the parcel by the delivery system operator (service personnel C. 22, L. 24-27) after the parcel is received by the delivery system operator for delivery (C. 21, L. 39-54).

Ramsden does not specifically teach:

transmitting a postage payment adjustment amount to the customer account based on a comparison between the first and second postage values.

Manduley et al. teaches a method and system for verifying postage amount, wherein the actual/proper postage due is compared with the amount submitted by a sender (C. 4, L. 58-60). In operation, the geometrical dimensions of the individual mailpieces are obtained and compared with operator inputted dimensions of a sample of the mailpieces batch, the proper postage rate is computed and compared to the amount submitted by a sender, and a postage payment adjustment amount is transmitted to the customer account based on a comparison between the first and second postage values (C. 5, L. 53 - C. 6, L. 8; C. 6, L. 23-35).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Ramsden to include transmitting a postage payment adjustment amount to the customer account based on a comparison between the first and second postage values, as disclosed in Manduley et al., because it would advantageously allow to avoid returning short paid mail to the sender where more postage is required.

Claims 34, 50, 66, 82 Ramsden discloses said computer-implemented method and system wherein the mailing information is received from the customer via computer, thereby suggesting a network (Figs. 11, 12, 15A-15D).

Claims 35, 51, 67, and 83. Ramsden discloses all the limitations of claims 35, 51, 67 and 83, including receiving the mailing information from the customer via the network, except that said information is received over the Internet. Official Notice is taken that the use of the Internet for receiving information is old and well known. The motivation to modify Ramsden to include the use of the Internet for receiving information would be to advantageously arrange the system in a distributed fashion, and presenting at the customer display guiding information which can be controlled from the central location, and promotional information which can be obtained from various remote sources (Ramsden, C. 19, L. 5-15)

Claims 36, 52, 68, 84. Ramsden discloses that the customer-determined attributes include weight of the parcel (Fig. 8).

Claims 37, 53, 69, and 85. Ramsden discloses that the mailing information comprises at least one of return address information, destination address information, and payment information.

Claims 38, 39, 54, 70, 71 and 86. Ramsden discloses that the mailing information comprises at least one of return address information, destination address information, and payment information.

Claim 40, 56, 72, 87. Ramsden discloses that the customer account is a credit card account (C. 15, L. 37; C. 19, L. 17-21).

Claims 41, 57, 73, and 88. Ramsden discloses that the mailing label further comprises a unique identification code for the parcel (bar-code) (C. 21, L. 22-29).

Claims 42-47, 55, 58-63, 74-79 and 89-94, see reasoning applied to independent claims.

Response to Arguments

Applicant's arguments with respect to claims 33-47, 49-63, 65-79 and 81-94 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Igor Borissov whose telephone number is 571-272-6801. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Hayes can be reached on 571-272-6708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
